

COGEN EUROPE ANNUAL CONFERENCE & DINNER 2013

The main cogeneration event in Europe
18-19 April 2013, Brussels

Cogeneration

At a time when Europe's agenda is dominated by financial and economic crisis, cogeneration offers European and national policy-makers and businesses an opportunity to make a significant contribution to economic growth, job creation and reduction of CO₂ emissions. Eleven per cent of Europe's electricity today is produced using cogeneration and an estimated additional 120 GWe of European cogeneration potential remains to be exploited. Cogeneration has European Union support for growth and it is generally recognised as a strategic energy choice for Europe.

Conference

COGEN Europe will celebrate its 20th anniversary this year at the upcoming **COGEN Europe Annual Conference & Dinner 2013** on 18-19 April in Brussels. The Conference is Europe's largest annual cogeneration event and this year we are looking at what is needed for cogeneration to continue playing its key role in helping Europe to reach its energy efficiency targets by 2050, and at the same time, identify the challenges and highlight new market and business opportunities.

The Conference will address the role that cogeneration can play in getting Europe out of the current financial and economic crisis. During these challenging times, the event is an opportunity to show EU and national policy-makers and businesses that the cogeneration sector can make a significant contribution to economic growth, job creation and reduction of CO₂ emissions.

The Conference brings together the strongest advocates and the most influential thinkers to highlight the

significant role that energy efficiency and cogeneration in particular must play in reaching the strategic EU energy goals. The conference will highlight the latest policy developments, existing market potentials and share best practice examples.

Conference Venue: Crowne Plaza, Hotel Rue Gineste 3, B-1210 Brussels

Agenda

The Conference will bring together energy professionals to discuss the challenges and contributions of cogeneration in EU energy policy. Confirmed speakers include representatives of the IEA, ExxonMobil, GE Power & Water, Wärtsilä, OPRA Turbines, Caterpillar, Siemens and Tata Chemicals.

The conference has four dedicated sessions on:

- Cogeneration in 2050
- Challenges for industries
- Micro-CHP and fuel cells
- Cities and bio-energy cogeneration

Dinner and Awards

The Conference Dinner will be held at The Square in the evening of 18 April. As in previous years, COGEN Europe will recognise exceptional contributions to the sector through the COGEN Europe Annual Recognition Awards.

Dinner Venue: Panoramic Hall, The Square - Brussels Meeting Centre, Rue Mont des Arts, B-1000 Brussels
