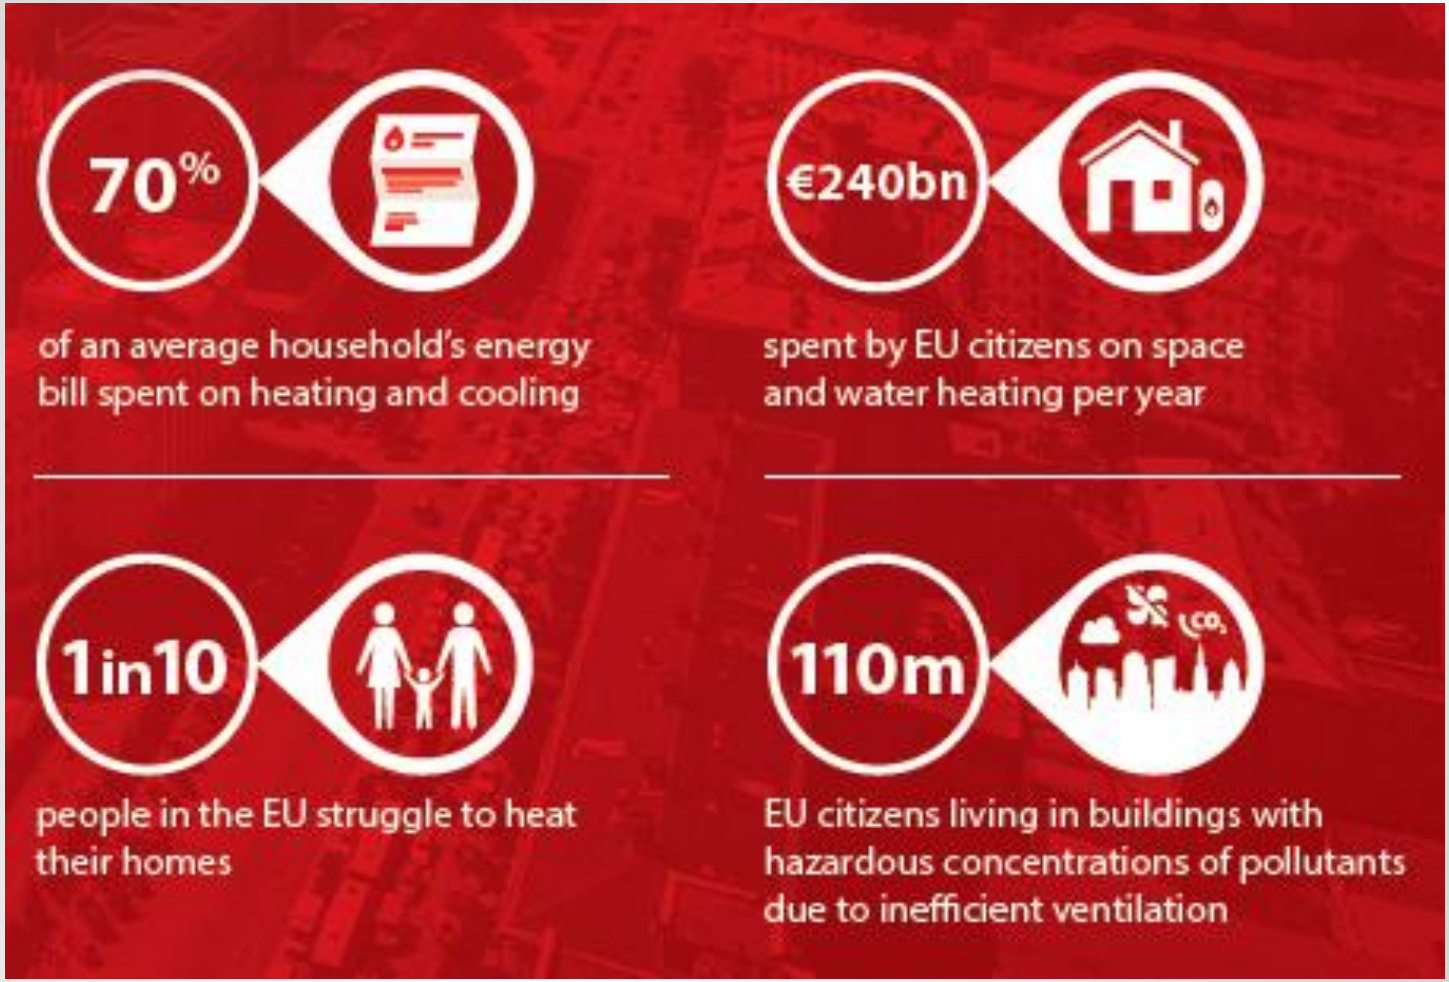
Industry rallying behind an innovative model

6 November 2017– Alix Chambris

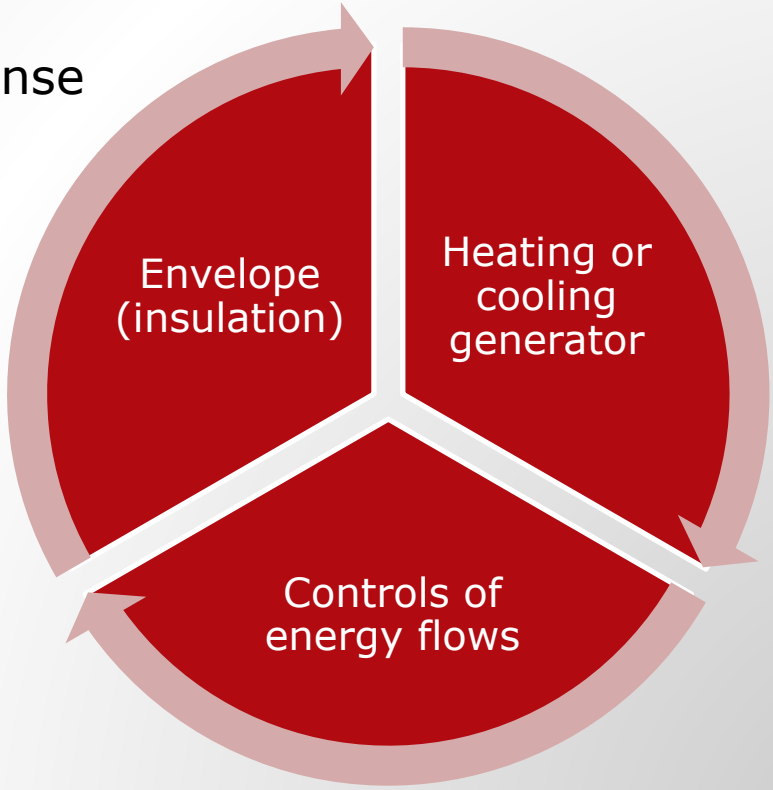
Build-up webinar organized by BPIE on BetterHome

1. The challenge



2. The success factors

- Strong links between the founding companies
  - Mutual trust
  - Readiness to share the risks
- Firm conviction that this makes sense
  - For people's comfort
  - For the environment/climate
- Clear policy framework



The 3 pillars of energy efficiency in buildings

3. Lessons learned and call for action

Increase demand for energy renovation with LT **renovation strategies and targets**

Grant access to **energy consumption data** to energy renovation companies or ESCOs while respecting privacy rules

Boost the **number of skilled installers**

Support **innovative business models coming from supply-side actors**

Set-up a framework for **Building Renovation Passports**.

Use available **EU funds** to support the set-up of industry-driven renovation models

Collect, and make available, **more reliable data** about the building stock and energy consumption across Europe

4. The future
