New guidebooks on financing building renovation by Energy Cities

Local and regional authorities have to be resourceful and open-minded to invent and test new financing mechanisms, business models, organisational structures and partnerships to make their sustainable energy projects happen. This requires strong technical, financial, legal and coordination skills and expertise in local authorities. [Read more](#)

Practices

European Energy Service Initiative's final report is out!

In nine metropolitan regions, a total of 27 Energy Performance Contracting (EPC) pilot projects have been realised within EESI 2020, with cumulative investments in energy efficiency of more than 26 M€, leading to average energy cost savings more than 30%, reducing CO2 emissions by 16.000 tons per year. Mainstreaming deployment of renewable energy: a European Commission study

The study addresses ways of generating long term funding for renewable projects across all sectors, including transport sector and in the heating and cooling sector.

The study also investigates measures aimed at ensuring more European citizens participate in the transition to clean energy, especially through the development of renewable energy communities. [Read more](#)

Making our iconic city skyline better for the planet

When stepping off a train or plane to visit a city for the first time, you wonder: will it live up to expectations, will it look like it does in the movies? Then the towering skyline of New York City, Hong Kong or Tokyo hits you and it takes your breath away. As a tourist it's exciting; however, viewed through the lens of a policy maker with the task of making those buildings energy efficient, it's a daunting prospect.

[Urban Efficiency II: Seven Innovative City Programmes for Existing Building Energy Efficiency](#), serves as a reference and evidence base for city officials developing or improving building energy policies. [Read more](#)

Events

Delivering Fast Track and Affordable nearly Zero Energy Buildings

2nd March - Ireland

The event, organised by the nearly Zero Energy

Active House at Ecobuild

Design and development of healthy and comfortable buildings
