

## News

### Getting our homes future ready

BUILD UP partner Housing Europe and the PROF/TRAC project presented concrete examples of energy efficiency in social housing at the workshop '**Getting our homes ready: Essentials skills and innovative solutions for a fair energy transition**' [Read more](#)

### New minimum requirements under Ecodesign and Energy Labelling Directives

Two European Directives - the Ecodesign and Energy Labelling Directives – and their accompanying regulations have introduced new minimum requirements for water heaters, ventilation units and heating appliances as well as a label to inform about their performances. These articles present the requirements and the foreseen label.

### From Thousands to Billions - Coordinated Action towards 100% Net Zero Carbon Buildings By 2050

In the report '**From Thousands to Billions - Coordinated Action towards 100% Net Zero Carbon Buildings By 2050**' the World Green Building Council calls for a dramatic and ambitious transformation towards a completely zero carbon building sector. This would be necessary in order to keep global warming below 2 degrees Celsius.
