

Are you an innovative energy service provider, have you promoted energy services in a remarkable way or have you been successful in implementing an energy service project in the public, commercial or lighting sector? Then apply now for the

European Energy Service Award 2009

We are searching for Europe's Best:

Energy Service Provider

Energy Service Promoter and

**Energy Service Projects in the Public,
Commercial and Lighting Sector**

Award Criteria and Application documents at
<http://www.european-energy-service-initiative.net>

Application Deadline: 30 April 2010

This year the European Energy Service Award will be bestowed for the fifth time. Since 2005 outstanding efforts and achievements for the development and success of energy services for energy efficiency in Europe are honoured. The award is offered in the above-mentioned five categories.

The award is highlight of the European Energy Service Initiative which was developed and launched in June 2009. Its principal aim is to increase awareness on the options and opportunities of energy services by showing its successes and to motivate others.

The award ceremony will take place in Brussels, in the framework of the European Energy Service Day, a high level conference on energy efficiency and energy services. An invitation will be sent out separately.
