

Statistics on Europe's building stock

A guide to collecting, harmonising and sharing data

Better data is required to develop more energy efficient buildings. As strategies for improving the energy performance of buildings become more complex, policy-makers need more and better data to design and evaluate policies and programmes and to put in place monitoring systems to measure the progress of the various policy instruments.

This BUILD UP Web Seminar is an opportunity to:

- **learn more about building data and existing gaps in information;**
- **hear about the European Commission's vision for gathering and harmonising building data across Europe.**

We will look at the need for data for decision making (e.g. for EED and EPBD) and will highlight the available tools (e.g. national renovation plans, central EPC registers).

Join the discussion on building data transparency and the Linked Open Data concept.

Learn more from participants about how to make building data useful.

Participation is free.
Registration is required.
Capacity is limited.

**Thursday 28
November 2013**

11:00-12:00 Brussels time
10:00-11:00 London time
12:00-13:00 Athens time

**In collaboration
with:**

**CHANCE
FOR BUILDINGS**

Speakers:

- **Oliver Rapf, BPIE & BUILD UP**
Introduction
- **Laurent Deleersnyder, European Commission, DG ENER**
The importance of data about buildings – the European Commission’s perspective
- **Aleksandra Arcipowska, BPIE**
Currents status of EU building data
- **Chris Hughes, Sustainable Energy Authority of Ireland**
The central EPC registers - tools for collecting data on buildings
- **Petr Holub, Chance for Buildings**
Data collection for the Czech national renovation plan
- **Jens Laustsen, GBPN**
Benefits of sharing data and the Linked Open Data concept
